PoolCop

Always. Better. Blue.

PRECISION
POOL CARE

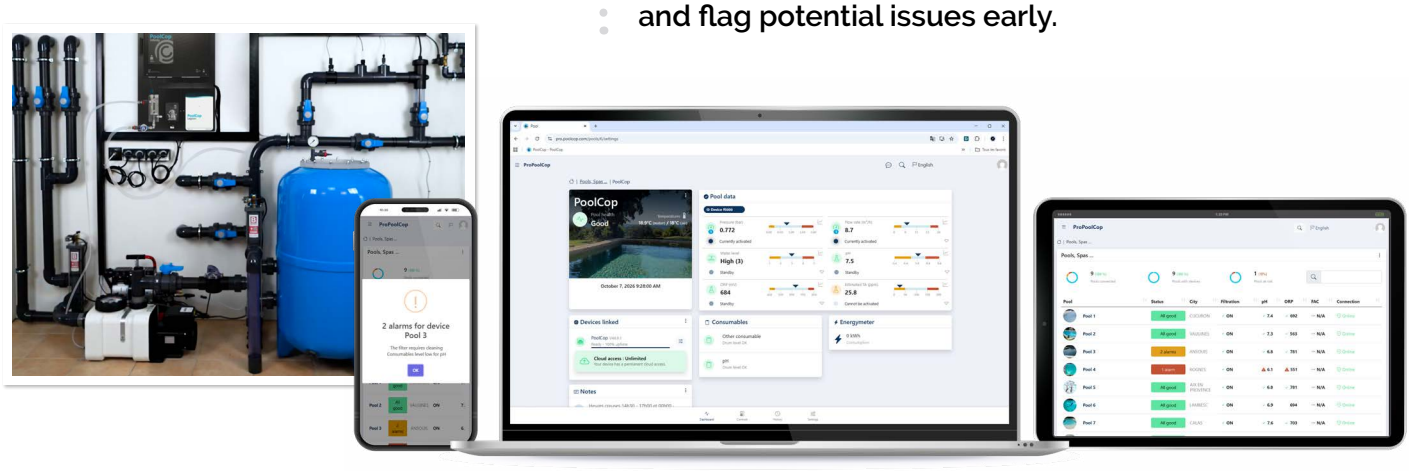

WHY POOLCOP?

So much more than a little black box !

ON-SITE PRESENCE 24/7

With a smart control unit in the pump house and powerful data analysis in the cloud, PoolCop is an essential source of monitoring, insight and control, providing pool information around the clock.

By comparing real-time readings with historical trends and changing conditions, PoolCop combines data analysis with intelligent automation to manage equipment, adapt its operation to the pool's needs and flag potential issues early.

CLEAR INSIGHT FOR TARGETED ACTION

PoolCop collects, analyses and shares real-time information, helping professionals identify what needs attention and target their actions accordingly.

BETTER PREPARATION FOR EVERY VISIT

With pool information available before each visit, professionals can plan ahead, bring what they need and focus on the right work.

SMARTER USE OF RESOURCES FOR EVERY POOL

By adapting filtration, dosing and water refilling to the pool's actual needs, PoolCop helps reduce unnecessary water, energy and chemical use without compromising pool care.

ONE CONNECTED SYSTEM

Giving professionals the information they need to assess and respond at the right time, while giving owners a clear view of their pool.

REMOVE THE GUESSWORK
FROM POOL MAINTENANCE

DATA-DRIVEN POOL CARE WITH ESSENTIAL DISINFECTION CONTROL

2 RELAYS
pH & disinfection

Data Acquisition & Monitoring
