PoolCop

Always. Better. Blue.

TRANSFORMING
YOUR POOL EXPERIENCE

SWIMMING POOLS ARE Always. Better. Blue.

LESS GUESSWORK MORE CLARITY

Know what's happening in your pool, and how's it's being managed.

PoolCop brings together information from your pool and its equipment, turning readings into a clear picture of what's happening — so you and your pool professional can make informed decisions about its care.

Built on advanced technology, PoolCop combines data collection and analysis with smart automation and remote control. It helps manage pool equipment, adapt programmed functions to changing conditions and make more considered use of resources.

THE TECHNOLOGY IN THE PUMP HOUSE

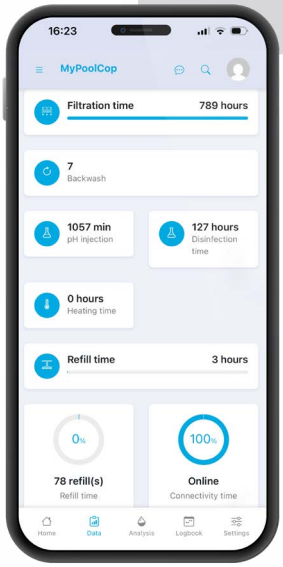

Monitoring, data and complete pool automation

Monitoring, data and essential disinfection control

USE ONLY THE NECESSARY RESOURCES

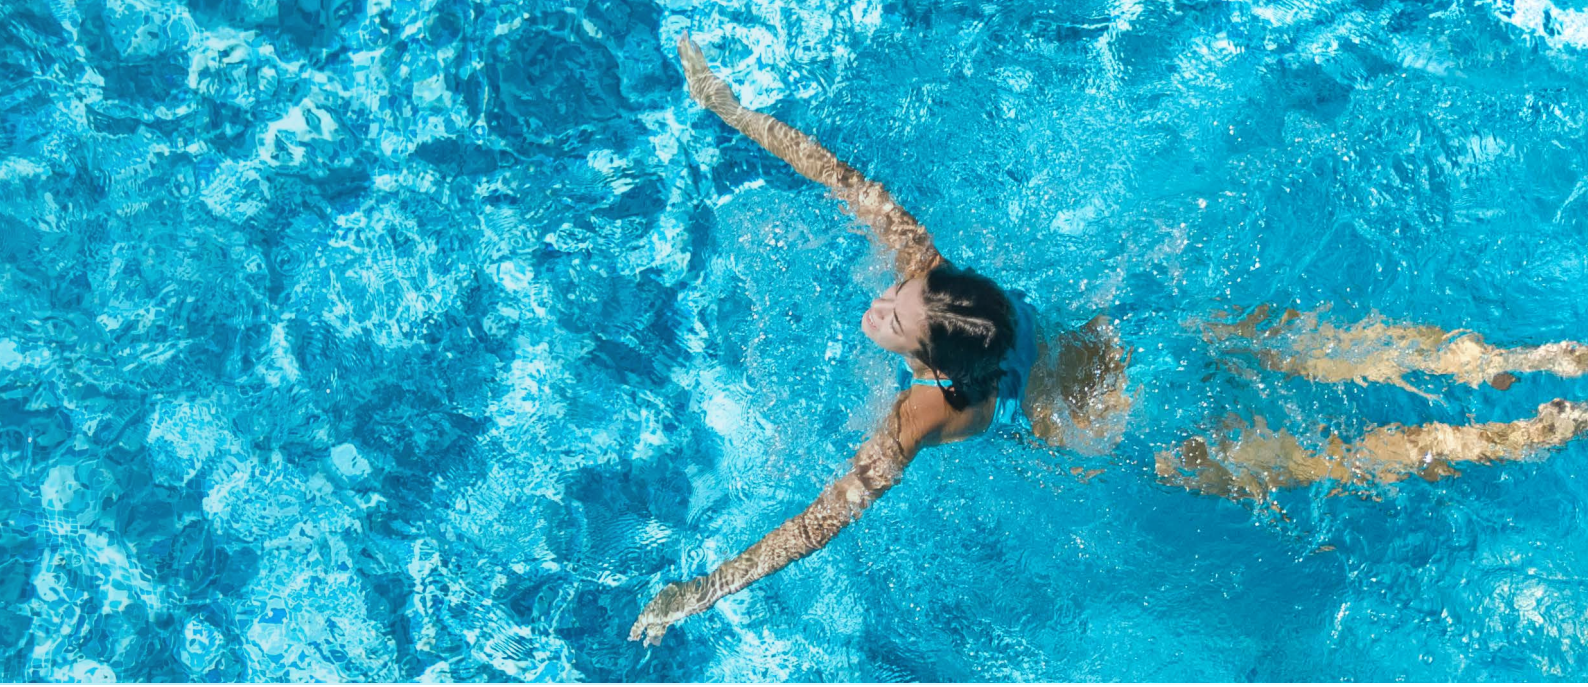

With its sustainable approach to pool maintenance, PoolCop is the key ally in using resources wisely, without compromising pool care.

Filtration, chemical dosing and water refilling adapt to the pool's actual needs. Weather forecasts can help avoid unnecessary refilling before rain, while backwashing can make use of excess pool water. Timed adjustments allow chemicals to disperse before readings are taken again, and early leak detection helps limit water loss.

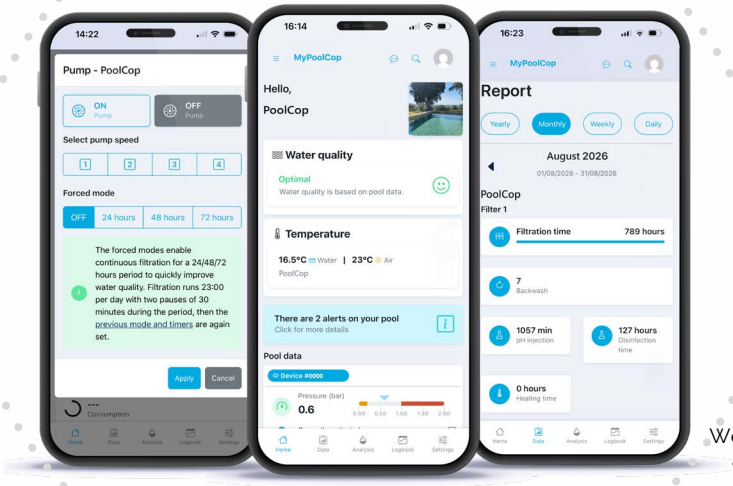

KEEP TRACK OF YOUR CONSUMPTION

Track resource use daily, weekly, monthly or yearly. Understand running costs, monitor consumption patterns and spot unusual changes that may need attention.

YOUR POOL AT YOUR FINGERTIPS

- Filtration programming
- Automatic filter cleaning
- Pump control and variable speed adjustment
- Early leak detection
- Water level control – refill & reduction
- Drum level monitoring
- Water pressure monitoring
- Overdosing security
- Water temperature control
- Anti-freeze protection
- pH control
- Pool lighting control based on ephemeris
- Disinfection control
- Weather dependent automatic refilling
- Water balance and alkalinity (TA)
- Water analysis via Bluetooth
- Pool cover monitoring & control
- Automatic firmware updates
- Control of additional equipment: cleaner, lighting, jet stream, heating, fountain, garden lighting and irrigation…

Pool information, alerts and remote control via **MyPoolCop**

ONE CONCEPT TWO SOLUTIONS

The first step towards a connected pool.

PoolCop Core provides real-time information on pool conditions, together with smart control of pH and disinfection.

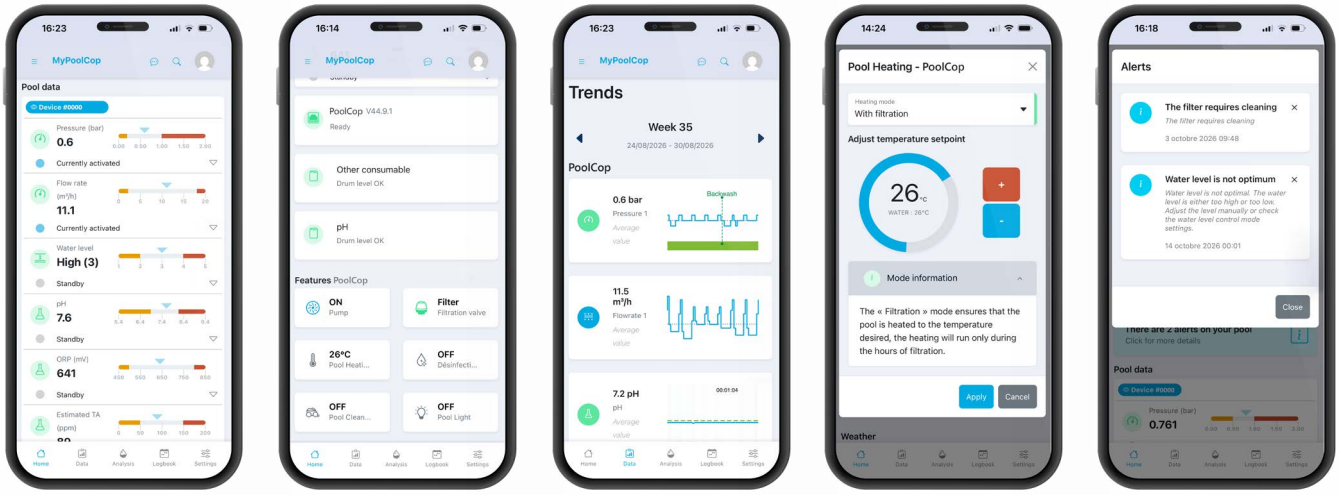

It's ideal for owners who want to understand what's happening in their pool and benefit from water treatment that responds to its actual needs, without having to automate the rest of their installation. Additional equipment control can be added later with PoolCop Edge modules, if and when needed.

The full potential of a connected pool.

PoolCop Infinity combines real-time pool data, intelligent pH and disinfection management, and complete automation tailored to each individual installation.

It offers a comprehensive, coordinated approach to managing pool equipment, as well as compatible outdoor equipment such as lighting, fountains and irrigation – bringing all these functions together for more efficient pool management.

Clear insight, smart control and more considerate pool care.

REAL-TIME POOL STATUS

PoolCop provides readings from connected sensors and equipment, giving you a clear overview of your pool's status at a glance, without having to check each element individually.

SMART ANALYSIS & EARLY ISSUE DETECTION

PoolCop cross-checks readings from the pool and its equipment to highlight unusual changes that may need attention. This helps you and your pool professional assess the situation and decide what action may be needed.

REMOTE ACCESS AND CONTROL

Check your pool's status, access key information and manage compatible equipment remotely, wherever you are. PoolCop puts useful information and controls at your fingertips, without needing to be beside the pool.

COMPATIBILITY

- Open system, compatible with third-party equipment
- Suitable for pools and spas of all sizes and flow rates
- Compatible with new installations, renovations and upgrades
