

PoolCop Ocean Conductivity Sensor

POOLCOP OCEAN CONDUCTIVITY SENSOR

See Catalogue and Product Information File for details and Technical Specifications.

GENERAL DESCRIPTION

The optional Conductivity Sensor for PoolCop Ocean allows for measurement and display of salt concentrations in the water. The sensor measures conductivity which is converted to a salt concentration in grams per liter.

COMPATIBLE

- PoolCop Ocean 60/120/200.
- PoolCop Evolution and PoolCop Genesis.

PoolCop Configuration Minimum Requirement:

- Firmware V44.4 or later.
- V40.0 – V44.3: Update via Cloud or USB
- ≤ V39.9: Electronics Upgrade Required

APPLICATION

- Conductivity measurement and calculation of salt level in water.

SPECIAL TOOLS - NONE

RECOMMENDATIONS

- See the PoolCop Installer and User Manual and manuals for all related equipment. Respect all warnings and guidance, which are not repeated here.

CONTENTS

1. Conductivity Sensor.
2. Sampling Chamber.
3. Sensor Holder.
4. Pluggable Electronic Daughter Board.
5. Reference solutions (x3).

INSTALLATION

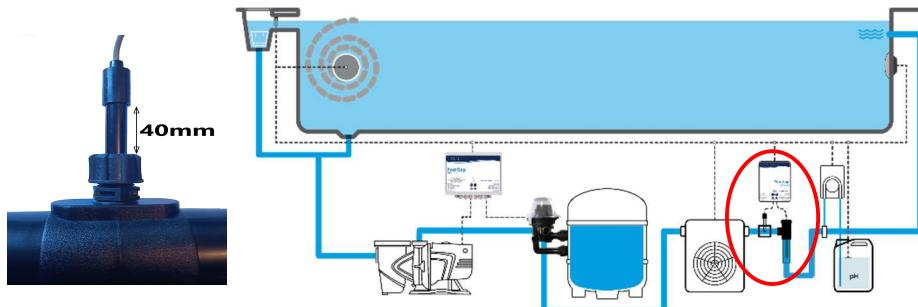

- Switch OFF PoolCop Ocean (red switch on the Power Pack).

INSTALLATION

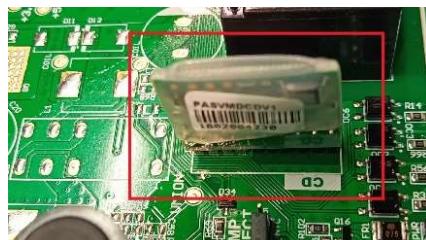

- Arrêtez PoolCop Ocean (bouton rouge sous le boîtier).

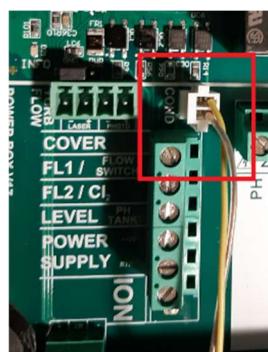

- Install the sampling chamber in return line to the pool **before** electrolysis cell and all chemical injection points.
- Tighten the sensor holder on to the sampling chamber.
- Remove the protecting cap from the sensor.
- Place the sensor in its holder, ensure 40mm between holder and sensor shoulder, and tighten the sensor holder.
- Placez la chambre d'analyse sur la ligne de retour vers la piscine avant la cellule d'électrolyse et avant les points d'injection de produits chimiques.
- Vissez le porte sonde sur la chambre d'analyse.
- Otez le bouchon de protection de la sonde.
- Placez la sonde dans son support, laissez 40mm de distance entre le support et l'épaulement de la sonde, et serrez le porte sonde.

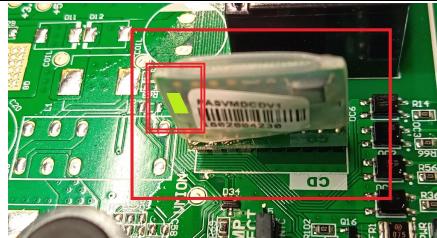

- Remove PoolCop Ocean front plate.
- Plug the daughter board into the "CD" slot.
- Retirez la face avant de PoolCop Ocean.
- Enfichez la carte électronique dans le connecteur "CD".

- Use a compression gland to route the sensor cable inside the PoolCop Ocean Power Pack.
- Plug the connector into the "COND" Terminal.
- Utilisez un presse-étoupe pour passer le câble de la sonde à l'intérieur du boîtier PoolCop Ocean.
- Branchez le connecteur sur le bornier "COND".

- Refit the front plate.
- Switch ON PoolCop Ocean (red switch on the Power Pack).
- Replacez la face avant.
- Redémarrez PoolCop Ocean (bouton rouge sous le boîtier).

SETTINGS - NONE	REGLAGES - AUCUN												
TROUBLESHOOTING	DÉPANNAGE												
Check that conductivity is displayed in "Diag Ocean" screen on PoolCop:	Vérifiez que la conductivité s'affiche dans la vue "Diag Ocean" de PoolCop :
